C_HANAIMP141
SAP Certified Application Associate (Edition 2014) - SAP HANA

Product Group	: SAP HANA
Solution	: SAP HANA
Sub-solution	: SAP Application Overview
Component	: Strategic Enterprise Management
Delivery Methods	: Certification
Level	: Associate
Exam	: 80 questions
Sample Questions	: PDF Link
Cut Score	: 59%
Duration	: 180 Min
Languages	: English, Japanese

Topic Areas

Please see below the list of topics that will be covered within this certification and the courses that cover them:

Data Provisioning> 12%

Describe possible scenarios and tools for replicating and loading data into SAP HANA from different data sources (e.g. SAP Landscape Transformation (SLT), SAP Data Services, or Direct Extractor Connection (DXC)).

- HA350 or HAIMPe

Security and authorization8% - 12%

Describe the authorization concept of SAP HANA and implement a security model using analytic privileges, SQL privileges, pre-defined roles and schemas. Perform basic security and authorization troubleshooting.

- HA300 or HAIMPe

Optimization of Data Models and Reporting8% - 12%

Monitor, investigate and optimize data models and reporting performance on SAP HANA. Advise on modeling approach and tools to achieve optimum performance. Evaluate the impact of different implementation options such as table joins, aggregation, or filters. Understand the implication on performance of the various reporting tools and connection types.

- HA300 or HAIMPe

Data modeling - Analytical views8% - 12%

Implement data models with SAP HANA using analytical views. Advise on the modeling approach and best practices.

- HA100 HA300 or HAIMPe

Data modeling - Calculation views8% - 12%

Implement data models with SAP HANA using calculation views, and advise on the modeling approach and best practices.

- HA100 HA300 or HAIMPe

Advanced data modeling8% - 12%

Apply advanced data modeling techniques, including currency conversion, variables and input parameters. Implement decision automation using business rules.

- HA300 or HAIMPe

Administration of data models8% - 12%

Administer data models in SAP HANA, including setting of information validation rules, managing schemas, the importing/exporting and transporting of data models.

- HA300 or HAIMPe

Reporting< 8%

Provide advice on reporting strategies, and perform appropriate reporting solutions with SAP HANA. Build reports using various tools, for example, Microsoft Excel or SAP BusinessObjects BI tools.

- HA100 or HAIMPe

Data modeling - SQL Script< 8%

Apply SQL Script to enhance the data models in SAP HANA using AFL, CE functions, and ANSI-SQL.

- HA300 or HAIMPe

Data modeling - Attribute views< 8%

Implement data models with SAP HANA using attribute views, and advise on the modeling approach and best practices.

- HA100 HA300 or HAIMPe

Deployment scenarios of SAP HANA< 8%

Describe the deployment scenarios for SAP HANA and evaluate appropriate system configurations.

- HA100 or HAIMPe

SAP HANA Live & Rapid Deployment Solutions for SAP HANA< 8%

Describe the value of HANA and identify scenarios for SAP delivered content for SAP HANA, such as SAP HANA Live and Rapid Deployment Solutions.

- HA100 or HA900 HA100e Or HA900
